***Reasons For Allowance***

The following is an examiner's statement of reasons for allowance:

The applicant have amended the claims, 11/4/09, to overcome the 112 2<sup>nd</sup> rejection in the **FINAL** Office Action dated 8/5/09.

The prior art does not teach a method of minimizing redundancy in a peer system in a peer-to-peer relay network, comprising: receiving a first message including first identification information at a first peer system from a second peer system connected to said first peer system in a peer-to-peer relay network; storing said first identification information; receiving a second message including second identification information at said first peer system from a third peer system connected to said first peer system in said peer-to-peer relay network; comparing said second identification information with said first identification information; building a redundancy update message when said comparison of said first identification information to said second identification information identifies the first message and the second message as the same message, wherein said redundancy update message is a message indicating that the first peer system is not to receive a new message from the third peer system because the new message has a path to the first peer system which allows the first peer system to receive the new message from a different peer system first, wherein the redundancy update message comprises information identifying the first peer system as a recipient peer system and information identifying the third peer system as a source peer system and indicates that a next message from the source peer system is not to

be sent to the recipient peer system; and sending said redundancy update message to said third peer system.

In particular, the method in a peer to peer network where there is a comparison of IDs from different messages received at a certain peer(1st peer) based on the comparison of IDs of the message, building a redundancy update message to indicate to a peer system(3rd peer) not to send new messages to that certain peer system(1<sup>st</sup> peer) because any new message are being sent by another peer(e.g.2<sup>nd</sup> peer or 4<sup>th</sup> peer, etc.), see also Remarks filed on 4/8/09, pages 16-23.

**Note:** Claims 26-30, recites "a tangible storage medium", which is deemed statutory as applicant's specification, para.0173, describes hard and floppy disk drives, CD-ROM drives, and magnetic tape drives, which one ordinary skill in the art would consider to be "tangible storage medium".

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
